If your doctor has recommended regular monitoring of your blood pressure at home, then Omron HEM 7203 BP monitor is capable of providing BP measurements just as you would expect from your doctor. This **Omron blood pressure monitor is completely automatic** with an oscillometric method of determining readings.

Clinically validated, the BP monitor capably produces precise and genuine measurement readings. Omron HEM 7203 displays a unique symbol that indicates **Hypertension**, while your blood pressure is being measured. The digital BP monitor also features a **movement indicator** that prevents possible measurement errors.

## Build

The body of this digital Omron monitor is conceptualized for simplicity and ease of use. The BP monitor comprises of two parts, the **main display unit and the cuff**. The main unit consists of control buttons and a **large LCD display** which enhances visibility, making it easily readable for users. The automatic HEM 7203 comes with flexible fan shaped, **medium sized cuff** that is designed for comfort. The cuff is pre-formed making it easy to fit.

The process of measuring your blood pressure with Omron HEM 7203 is easy and simple. All you have to do is wrap the cuff around your arm and start measuring your blood pressure by pressing the measure button. With just the cuff and the display panel, the monitor is **portable and handy**.

## Performance and Features

The Omron 7203 upper arm BP monitor is **supported with IntelleSense technology** that enables automatic inflation and deflation giving accurate digital readings with the best possible comfort. The Automatic Omron BP monitor displays a range from 0 to 299 mmHg for pulse readings and 40 to 180 beats/minute for pulse rates. **Highly calibrated**, the monitor's accuracy rate stands at +/- 3 mmHg for blood pressure and +/-5% of reading for pulse rates. This Omron digital blood pressure monitor displays quick and accurate measurement readings of systolic and diastolic blood pressure and pulse readings.

The HEM 7203 digital BP monitor **can store up to 30 sets of reading** with date and time in order to keep track of your blood pressure measurement history. The monitor is also capable of calculating and displaying the **average of last three readings** making it very accurate. This digital HEM 7203 blood pressure monitor features integrated replaceable batteries for enhanced mobility. 4 AA batteries are used to power this BP monitor. The upper arm Omron monitor can alternately run on electricity by using an adaptor (Adaptor to be bought separately) to power it.
